

23 December 2025

ANNOUNCEMENT

RE: Split on Argentum-10 (29/12/2025)

The Company would hereby like to inform its clients that the instrument Argentum-10 will undergo a split on the weekend of 27-28/12/2025, resetting its price to \$1,000. The affected accounts will be adjusted accordingly. For more information, please refer to the methodology of Argentum-10 in the link below:

What is a Split and when does it happen?

When the closing leveraged index value reaches a value above 10,000, the new inception index value (Market price) will be 1,000. A split adjustment is then carried out on the index in order to adjust the amount and the Profit & Loss of the position as it was previously.

For example:

The client owns 3 contracts of Argentum-10 with a value of \$600 on the 9th of December. If a split 1 to 3 is performed on the 10th of December that means that the client will be owning 9 contracts of Argentum-10 ($3 \times 3 = 9$) at a price of \$200 each ($600/3 = 200$). The value remains the same.
