## ANNOUNCEMENT

### RE: Split on BITA Italy40-10 (12/01/2026)

The Company would hereby like to inform its clients that the instrument BITA Italy40-10 will undergo a split on the weekend of 10-11/01/2026, resetting its price to \$1,000. The affected accounts will be adjusted accordingly. For more information, please refer to the methodology of BITA Italy40-10 in the link below:

What is a Split and when does it happen?

When the closing leveraged index value reaches a value above 10,000, the new inception index value (Market price) will be 1,000. A split adjustment is then carried out on the index in order to adjust the amount and the Profit & Loss of the position as it was previously.

For example:

The client owns 3 contracts of BITA Italy40-10 with a value of \$600 on the 9th of December. If a split 1 to 3 is performed on the 10th of December that means that the client will be owning 9 contracts of BITA Italy40-10 ( $3*3 = 9$ ) at a price of \$200 each ( $600/3 = 200$ ). The value remains the same.
